THE DeVRY FREE FILMS SOURCE DIRECTORY is published solely in the interest and advancement of Visual Education.

The films listed in this directory, in which there are over 1300, constitute, as far as we know, the most complete, authentic, up-to-date list of sound and silent motion picture films available *without charge* to schools, churches, clubs, hospitals, shut-in institutions, civic and social organizations, and other non-theatrical audiences.

When borrowing films from the various sources listed in this book, follow these provisions and save both the school and film sponsor time and extra correspondence.

1. Please specify the size of film (16mm. or 35mm.) and the type (sound or silent).
2. Return the film to the sponsor or distributor promptly. Holding a print causes inconvenience to others for whom the film is booked. Be sure to return the film to the proper office.
3. Give the sponsor or distributor adequate advance notice.
4. Give at least three optional dates in order of preference.
5. Please see that the films are handled with care.

These simple rules, if followed, will save the time and effort of film sponsors and enable the borrower to receive more efficient service.

## IMPORTANT !

Please *DO NOT* address requests for free films listed in this directory to DeVry. All requests for films should be sent direct to the sponsor or distributor indicated.

The DeVry Corporation handles only the DeVry Educational and Recreational Films and the Filmset Series on Geography described in the advertising pages of this book.

DeVry is indeed grateful for the friendly and courteous manner in which the sponsors and distributors of the films listed herein have cooperated in providing the information necessary for the preparation of this directory. Without their cooperation this directory would not be possible.

**Please mention this book when ordering  
films from distributors or sponsors.**

## The Film Prayer

I am celluloid, not steel; O God of the machine, have mercy. I front dangers whenever I travel the whirring wheels of the mechanism. Over the sprocket wheels, held tight by the idlers, I am forced by the motor's might. If a careless hand mistreads me, I have no alternative but to go to my death. If the pull on the take-up reel is too violent, I am torn to shreds. If dirt collects in the aperture, my film of beauty is streaked and marred, and I must face my beholders—a thing ashamed and bespelled. Please, if I break, don't attempt to fasten me together with pins or clips; simply stop the machine, and overlap the ends around the take-up reel—a sufficient distance to hold—then proceed with the showing. Don't rewind me unless necessary—my owner wants the privilege, so that he may examine me, heal my wounds, and send me rejuvenated upon a fresh mission.

I travel many miles in tin cans. I am tossed on heavy trucks, sideways and upside down. Please see that the paper band is wrapped snugly around me on the reel and fastened with a string, so that my first few coils do not slip loose in my shipping case, and become bruised and wounded beyond the power to heal. Put me in my own can. Scrape off all old labels on my shipping case so I will not go astray.

Speed me on my way. Others are waiting to see me. The next day is the last day I should be held. Have a heart for the other fellow who is waiting, and for my owner who will get the blame.

I am a delicate ribbon of film—misuse me and I disappoint thousands; cherish me, and I delight and instruct the world.

##### **(1) Latest Model DeVry 16 mm. Sound Film Projector**

Complete with **AMPLIFIER** and **SPEAKER**. Projector remains with schools during the school year and may be used to show other films. Projector serviced at regular intervals at our expense.

##### **(2) 48-400 Ft. Reels of Educational Films**

Schools select their own subjects from the comprehensive DeVry 16 mm. Film Library.

##### **(3) Lesson Plans**

Teachers' Lesson Plans, prepared by eminent authorities are furnished with most DeVry educational films.

##### **(4) Film Splicer**

Provided so that if break in film occurs, projectionist can correct it in a jiffy.

##### **(5) Extra Lamp**

Standard quality 750 watt T-12 pre-focused Mazda Projection Lamp. Insurance against lamp burnout.

Hundreds of small schools throughout the country are now enjoying the tremendous benefits of Audio-Visual Education — thanks to the DeVry "Circuit Service Plan."

### **HOW THE PLAN WORKS**

Any number of schools from 5 to 20 may participate. When 20 schools form a circuit, the cost, per school, per year is only \$25.00. When only 10 participate, the cost is only \$46.50.

Once a circuit is formed, the 16 mm. Sound Film Projector and one unit of film (usually four 400 ft. reels) is delivered to the first school in the circuit. This school uses the projector and films for their allotted time and delivers them to the next school. This continues until every school in the circuit has seen the first unit of films. Then, new film units are sent and the above procedure is repeated until all 48 reels have been seen.

If desired, payment may be arranged as service is being used. All transportation charges other than that between schools are included in original cost.

## FILMSETS ARE DEVISED TO TRAIN STUDENTS TO THINK

Each of the 48-200 ft. silent film subjects, with descriptive titles, contain more factual information than the average 400 ft. teaching film. Each film is both a single lesson and subject matter for several lessons. Filmsets supply definite situations and information with which to arouse classroom discussion, wherein students develop initiative and the ability to THINK. The basic effectual use of study films requires that such films be available whenever they become pertinent to the lesson. With Filmsets installed in your own building, the films are instantly available whenever and as often as needed.

**LESSON PLANS** for each subject are provided in a 112 page Teachers' Manual containing 672 illustrations.

**SELF HUMIDIZING CABINETS** for housing the films are included. Each section holds 16 films.
